1. The Russian general director of Siemens-Plania, Berlin-Lichtenberg, is Ossyadowski (fnu). His interpreter is Kurt Lange.
2. Siemens-Plania receives Muellergraphite from Austria. The most recent shipment of 300 tons was delivered by rail from Passau.
3. During a discussion which took place between top management officials of Siemens-Plania, two unidentified representatives of USIG, and Dr. Ehlers (fnu) of Piesteritz, the latter reported that the graphite plates which Siemens-Lichtenberg had delivered to Piesteritz had not met the required quality specifications for use in their electrolytic process. Ehlers had therefore ordered some of these plates from Meitingen and had obtained them without difficulty. The Russians then ordered Dr. Ehlers to obtain additional plates from the Meitingen plant of Siemens-Plania and to determine by analytical means the composition of the Meitingen plates, so that the Lichtenberg plant can develop a new chemical mixture which will produce the same effect.
